1. OVERALL SOFTWARE QUALITY SCORE

58.89

/ 100 OVERALL

DEVELOPING

Score Band Classification

Methodology: Weighted composite calculation of Code Quality (25%), Maintainability (20%), Architecture (20%), Testing (15%), Security (10%), Documentation (10%). Evaluated against rule-based heuristic benchmarks.

2. QUALITY SUB-SCORES BREAKDOWN

SUB-SCORE CATEGORY	WEIGHT	SCORE (0-100)	EVALUATION BAND
Code Quality	25%	45.00	Developing
Maintainability	20%	74.04	Proficient
Architecture	20%	100.00	Excellent
Testing Suite	15%	0.00	Needs Improvement
Security	10%	100.00	Excellent
Documentation	10%	28.35	Needs Improvement

3. KEY REPOSITORY TELEMETRY FACTS

TOTAL LINES OF CODE	SOURCE FILES	DEPENDENCIES	GIT COMMITS
4,003	31	25	1
Code LOC: 3,446	Total Files: 53	Declared Packages	Recorded Commits

4. DOMAIN ENGINE METRIC SUMMARIES

COMPLEXITY ENGINE SUMMARY

Average Complexity: 2.54
Max Cyclomatic Complexity: 11
High-Complexity Functions (>10): 2

SECURITY ENGINE SUMMARY

Total Security Findings: 0
Critical: 0 | High: 0
Medium: 0 | Low: 0

5. MACHINE LEARNING MATURITY PREDICTION

MODEL PREDICTED MATURITY LEVEL:

INTERMEDIATE

Confidence: 82.0%

"Model prediction — not an objective fact"

SOFTWARE QUALITY ANALYSIS REPORT (CONT.)

Actionable Code Remediation Recommendations

Generated: Sep 10, 2026

6. ACTIONABLE REMEDIATION RECOMMENDATIONS

PRIORITY	CATEGORY	PROBLEM & ACTIONABLE RECOMMENDATION
HIGH	Testing	No automated test suite detected in repository Action: Setup a modern test framework (e.g. Jest/Vitest for JS/TS, pytest for Python, JUnit for Java) and write unit tests for critical business logic.
HIGH	Duplication	High code duplication detected (20.57% duplicated LOC across 27 blocks) Action: Extract repetitive code blocks into shared utility functions, reusable component modules, or base classes.
MEDIUM	Complexity	Elevated function complexity detected (Max Cyclomatic Complexity = 11) Action: Decompose complex functions into smaller, single-responsibility helper functions. Refactor nested conditional loops into early guard clauses.
LOW	Documentation	Documentation completeness score is low (28.4/100) Action: Expand README.md with clear step-by-step setup guides and document key public API methods.
